H AND T SPEED RATED

The W507 is Blacklion's studdable winter passenger tire designed for drivers looking for excellent traction on ice and snow. The W507 has been tested in the harshest conditions and outperformed major brand competitors. The directional tread, with deep snow evacuation grooves and biting edge sipes, balances a smooth quiet ride with aggressive winter traction. The W507's computer engineered tread design also provides excellent turning and stopping capabilities for our severe North American winters.

- Directional tread pattern features serrated channel design to improve traction on ice, snow and mud.
- Multi-directional sipes increase contact area to improve grip and handling in ice and snow conditions, without compromise to ride comfort.
- Specially formulated cold-resistant compound ensures that tires stay soft in order to provide excellent traction and handling.
