### Q, R, S, AND T SPEED RATED

The Blacklion W517 is a premium studdable winter tire designed for light trucks and SUVs. The aggressive directional tread pattern features our X-Groove channels to evacuate slush and snow for superior traction on icy and snow covered roads. Specially formulated tread rubber compound remains pliable and effective in the coldest temperatures. The W517 handles the most severe road conditions our North American winters can dish out.

- X-Groove channel design promotes multi-directional grip in snow, slush, and wet conditions while minimizing road noise.
- Solid center rib provides stability and superior handling while cornering in harsh winter conditions.
- Specially formulated silica reinforced tread rubber ensures winter tires perform in the coldest temperatures.
